

(title) _____

The hair on your head grows about half an inch each month. It grows faster during the day than during the night. It grows faster in summer than in winter. Each hair grows for two to six years. Then it falls out and a new hair grows. You might lose up to 100 hairs on your head every day. You don't miss them because you have about 100,000 hairs on your head.

Main Idea

1. Write a sentence that tells what this story is mostly about.

Details

2. How much does the hair on your head grow in a month?

3. How many hairs might you lose on your head in a day? _____

Comparison

4. Fill in the blanks with the correct answer.

Hair grows _____ during the night than during the day.

Hair grows _____ in summer than in winter.

Locating the Answer

5. Write the sentence that tells how many hairs you have on your head.

Sequence

6. What happens to one piece of hair after about six years? _____

- a. It turns a different color.
- b. It falls out and a new hair grows.
- c. It becomes curly.

Title

7. Give the story a title. Write the title on the line above the story.

(title) _____

Windmills help us use the energy of the wind. The wind moves the arms of the windmill. We can use the wind to make electricity. You can see this kind of windmill in the deserts of California.

We can use the energy of the wind to grind grain. You can see this kind of windmill in Europe. We can use the wind to pump water. You can see this kind of windmill in Texas and Oklahoma.

In some places, the wind is too strong for a windmill. The wind would just blow the windmill down.

Main Idea

1. What is this story mostly about? _____
 - a. how to make electricity
 - b. wind and windmills
 - c. how to make energy

Details

2. Which of the following is *not* something windmills can be used for? _____
 - a. to pump water
 - b. to make electricity
 - c. to grow plants

Locating the Answer

3. Circle the name of the place where windmills grind grain.

Fact or Opinion

4. Windmills are the best way to make electricity. _____

Conclusion

5. If you see the arms of a windmill in California moving, what is probably happening? _____
 - a. it is grinding grain
 - b. it is pumping water
 - c. it is making electricity

Title

6. Give the story a title. Write the title on the line above the story.

35. 1. A 2. 640 lbs. 3. wood pulp 4. They called it papyrus. 5. A 6. C 7. *Answers will vary.*
36. 1. C 2. middle 3. C 4. It cooked the same all over. 5. It tasted good. 6. *Answers will vary.*
